1 Introduction

This description details what information the State Treasury has in its possession for the performance of the agency's tasks. The description is based on section 28 of the [Act on Information Management in Public Administration](#).

The purpose of the description is to assist individuals and communities in submitting information requests to the State Treasury. An information request is a request for concerning an authority's document(s) in which the applicant requests information on the authority's document(s). The request may concern an individual piece of information/document, a document consisting of information from different sources, or more extensive official material.

As laid down in section 13 of the Act on the Openness of Government Activities (621/1999), a request for information submitted to the State Treasury must be set out in sufficient detail. Based on a well set out request, the State Treasury can determine the information or document the request concerns. The purpose of this description is to assist the person submitting an information request to set out the necessary details for the request.

Information and investigation requests addressed to the State Treasury can be submitted by email to registry@statetreasury.fi or by post to the State Treasury, P.O. Box 14, 00054 State Treasury.

By using the secure messaging service, you can contact the registry office via a protected email. The State Treasury's website provides the option to use the secure messaging service: [State Treasury's contact information - Valtiokonttori](#)

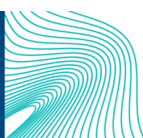

It is recommended to submit a request to access your personal data using the [Personal Data Access Request Form](#) (in Finnish). You can submit the form by post (signed and sent to the address above), via email to the registry office, or through the secure messaging service. Alternatively, you may submit an informal request via regular email.

After receiving any request, the State Treasury will process the request in accordance with currently valid legislation and respond to it.

2 Cases recorded in the State Treasury's case register

The State Treasury maintains a case register on the cases that are pending and those that have already been processed. Information on the case, its processing and its related documents is recorded in the case register. The term case refers to one event, for example one case of processing a compensation claim for an occupational accident. One case may include several documents.

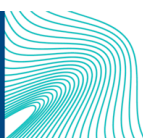

The tables on the following pages describe the databases that are included in the State Treasury's case register and from which the State Treasury can be requested to provide information.

The State Treasury's electronic case register is maintained in the case management system. The tables below provide additional information about other information systems, in which the State Treasury processes and stores data.

Search criteria in the electronic case register include:

1. Unique identification information, such as case, loan or claim number,
2. Contact details of the case or document, such as the name of the sender, recipient or processor (person or organisation),
3. The date of the case or document, such as the date on which a document's processing began or when the document was received or sent, and
4. Factors related to the content of the case or document, such as the type of compensation, type of loan, title of the document.

3 State Treasury Information resources

3.1 State compensations for damages

Information resource	Data by group	Examples of search criteria	Information systems related to the materials	Availability via a technical interface (y/n)
Compensation for legal costs to those employed by the State	Information on events leading to damage, claimant's identification and contact details, claimant's employer information, compensation information, payment information, information on appeal	Claim number, claimant's name, claimant's personal identity code, claimant's employer	Damage compensation system, case management system	No
Personal injuries caused by large predators	Information on events leading to damage, predator species, identification and contact details for the victim and the beneficiary, compensation information, payment information, information on appeal	Claim number, name, personal identity code, date of damage, predator species	Damage compensation system, case management system	No
Crime damages	Information on events leading to damage, identification and contact details of persons involved, information regarding the claimant's representative, compensation information, payment information, information on appeal, information on court decision	Claim number, name or personal identity code of a person involved, date of damage, information on court decision, offense category	Damage compensation system, case management system	No

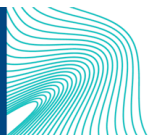

Information resource	Data by group	Examples of search criteria	Information systems related to the materials	Availability via a technical Interface (y/n)
Benefit equivalent to group life insurance	Information regarding the deceased person, beneficiary's identification and contact details, the deceased person's employer information, compensation information, payment information, information on appeal	Claim number, name, personal identity code, employer of the deceased person	Damage compensation system, case management system	No
Military injuries and service-related illnesses	Information on events leading to damage, personal identification and contact details, compensation information, payment information, information on appeal	Claim number, name, personal identity code, date of damage, Service-related illness diagnosis code	Damage compensation system, case management system	No
Wrongfully imprisoned	Information on events leading to damage, personal identification and contact details, information regarding the claimant's representative, compensation information, payment information, information on appeal	Claim number, name, personal identity code	Damage compensation system, case management system	No
Accidents and occupational diseases in crisis management duties	Information on events leading to damage, personal identification and contact details, compensation information, payment information, information on appeal	Claim number, name, personal identity code, date of damage, location where damage occurred (area of responsibility), occupational disease diagnosis code	Damage compensation system, case management system	No
Accidents at work and occupational diseases	Information on events leading to damage, person's identification and contact details, employer information, compensation information, payment information, information on appeal	Claim number, name, personal identity code, date of accident, employer, occupational disease diagnosis code	Damage compensation system, case management system	No

Information resource	Data by group	Examples of search criteria	Information systems related to the materials	Availability via a technical Interface (y/n)
Accidents caused by state-owned vehicles	Information on events leading to damage, person's identification and contact details, employer information, compensation information, payment information, information on appeal	Claim number, name, personal identity code, date of accident, employer, vehicle registration number	Damage compensation system, case management system	No
State travel protection	Information on events leading to damage, person's identification and contact details, employer information, compensation information, payment information, information on appeal	Claim number, name, personal identity code, date of accident, employer	Damage compensation system, case management system	No
State travel protection, notification of invited persons	Identification and contact details of the person invited, contact details of the person submitting the invitation, invitation time, destination country.	Date of arrival of the notification, organisation notifying of the invitation, invitation time, country of destination.	File management system	No
Compensation based on state liability	Identification and contact details for the person or entity claiming compensation, information on events leading to damage, compensation information, payment information, information on appeal, details of the authority responsible for the damage, statistical and reporting data	Claim number, claimant's name, claimant's personal identity code or business ID (y-tunnus), authority responsible for the damage, government branch	Damage compensation system, case management system	No

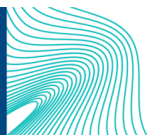

Information resource	Data by group	Examples of search criteria	Information systems related to the materials	Availability via a technical Interface (y/n)
Damage to property caused during official duties or work tasks	Information on events leading to damage, claimant's identification and contact details, claimant's employer information, compensation information, payment information, information on appeal	Claim number, claimant's name, claimant's personal identity code, date of accident, claimant's employer	Damage compensation system, case management system	No
Compensation for delays in court proceedings	Identification and contact details of persons, companies and entities receiving compensation, contact details of agents, details of court decisions, information on compensation	Name of the compensation recipient, personal identity code or business ID of the compensation recipient, identification details of the court's decision	Case management system, central government's shared order and invoice processing system	No

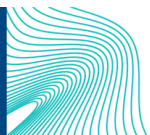

3.2 Compensation for war and military invalids and veterans

Information resource	Data by group	Examples of search criteria	Information systems related to the materials	Availability via a technical Interface (y/n)
Rehabilitation for those who have served in certain duties related to wars	Applicant's identification and contact details, application information, information on decision, statistical and reporting data	Applicant's name, personal identity code	Case management system, claim processing system, central government joint order and invoice processing system	No
Funding for outpatient services for front-line veterans	Appropriations for outpatient services and their allocation, annual reports on utilized funds, unused funds from the previous year and their returns, advance requests for next year's budget needs, contact details of funding recipients, statistical and reporting data.	Funding recipient (City of Helsinki, wellbeing services counties, Åland municipalities), service type, time period	Funding allocation system, central government shared order and invoice processing system	No
Funding for the rehabilitation of front-line veterans	Appropriations for rehabilitation and their allocation, annual reports on utilized funds, unused funds from the previous year and their returns, contact details of funding recipients, number of front-line veterans by funding recipient, statistical and reporting data.	Funding recipient (City of Helsinki, wellbeing services counties, Åland joint municipal authority), form of rehabilitation, time period	Funding allocation system, central government shared order and invoice processing system	No

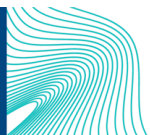

Information resource	Data by group	Examples of search criteria	Information systems related to the materials	Availability via a technical Interface (y/n)
Funding of outpatient services for war and military invalids	Appropriations for outpatient services and their allocation, annual reports on utilized funds, unused funds from the previous year and their returns, advance requests for next year's budget needs, contact details of funding recipients, State Treasury's decisions on the use of the previous year's appropriations by funding recipients, statistical and reporting data.	Funding recipient (City of Helsinki, wellbeing services counties, Åland municipalities), service type, time period	Case management system, funding allocation system, central government shared order and invoice processing system	No
Compensation for war and military invalids	Claimant's identification and contact details, identification and contact details of family members entitled to compensation, information on other interested parties (guardians, municipalities, hospitals, doctors, pharmacists, companies that have sent invoices, other entities, etc.), claimant's account number, compensable disability, degree of disability percentage / disability severity, eligibility and compensation details, appeal information, statistical and reporting data	Claim number, name, personal identity code	Case management system, claim processing system for military disabilities	No
Rehabilitation for spouses and widows of disabled veterans and widows of fallen soldiers	Identification and contact details for the applicant, application information, information on decision, statistical and reporting data	Applicant's name, personal identity code	Case management system, claim processing system, central government joint order and invoice processing system	No
Rehabilitation for veterans living abroad	Identification and contact details for the applicant, application information, information on decision, statistical and reporting data	Applicant's name, personal identity code	Case management system, claim processing system, central government joint order and invoice processing system	No

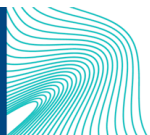

3.3 Penalty fees for neglecting statutory insurances

Information resource	Data by group	Examples of search criteria	Information systems related to the materials	Availability via a technical Interface (y/n)
Penalty fees for neglecting pension insurance contributions	Identification and contact details of the party subject to insurance obligation (person, company or other entity), information on negligence, information on penalty fee for negligence	Personal identity code or business ID of the party subject to insurance obligation	Case management system	No
Penalty fees for neglecting motor vehicle liability insurance	Identification and contact details of the party subject to insurance obligation, information on negligence, information on penalty fee for negligence	Name, personal identity code or business ID of the party subject to insurance obligation, vehicle registration number	Damage compensation system, case management system	No
Penalty fees for neglecting patient insurance	Identification and contact details of the party subject to insurance obligation (person, company or other entity), information on negligence, information on penalty fee for negligence	Personal identity code or business ID of party obligated to take out insurance	Case management system	No
Penalty fees for neglecting occupational accident insurance	Identification and contact details of the party subject to insurance obligation (person, company or other entity), information on negligence, information on penalty fee for negligence	Personal identity code or business ID of the party subject to insurance obligation	Damage compensation system, case management system	No

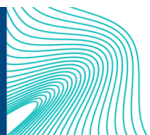

3.4 State advocacy

Information resource	Data by group	Examples of search criteria	Information systems related to the materials	Availability via a technical Interface (y/n)
Inheritance matters, estates of people who have died without heirs	Identification details of the deceased, information on the person reporting the estate, information on the estate administrator, information on the decision on distribution of the estate, information on appeal	Name, personal identity code, date of death and last municipality of residence of the deceased person, municipality applying for property	Case management system, customer information system	No
Inheritance matters, testaments of people who have died without heirs	Identification details on the deceased, information on the person reporting the testament (private persons and associations), information on the approval of the testament	Name, personal identity code, date of death and last municipality of residence of the deceased person	Case management system, customer information system	No
Exemption from payment issues	Identification and contact details for the applicant, authority recovering the payment, the amount of exemption claimed, information on the decision, case-specific additional reports, information on appeal, statistical and reporting data	Applicant's name and personal identity code, authority responsible for collecting the payment, time period	Case management system, customer information system	No

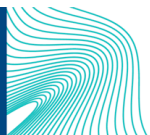

3.5 Other information resources of the Compensations department

Information resource	Data by group	Examples of search criteria	Information systems related to the materials	Availability via a technical Interface (y/n)
Business subsidies 2020–2023 (including cost support, event guarantee, closure compensation, fuel support, electricity and fertilizer support for agriculture, compensations to electricity companies)	Applicant identification data, application information, decision details, payment information, appeal information	Applicant's name, applicant's business ID	Case management system	No
Statistics and reports of the Compensations department	Number of applications, number of decisions, processing times, submitted appeals, types of decisions, compensations paid	Compensation/ decision type, time period	Reporting databases, Power BI reporting, some of the information is published on the State Treasury website at valtiokonttori.fi	No

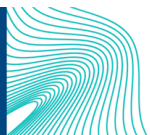

3.6 State financial management

Information resource	Data by group	Examples of search criteria	Information systems related to the materials	Availability via a technical Interface (y/n)
Activities related to funds	Financial transactions, operational guidelines, agreements, and procedures as well as account numbers related to the National Nuclear Waste Management Fund, Intervention Fund of Agriculture, National Housing Fund and Financial Stability Fund	Transaction number, date of trade, value date, maturity date, counterparty, portfolio, instrument	Treasury Information System, case management system	No
Financial market data	Including interest and exchange rates	Quotation date, recording date	Market information service, Treasury information system	No
Funding of Senate Properties	Financial transactions, operational guidelines, agreements, and procedures as well as account numbers	Transaction number, date of trade, value date, maturity date, counterparty, portfolio, instrument	Treasury Information System, case management system	No
Central government revenue and expenditure forecasts and actual revenue and expenditure	Central government revenue and expenditure forecasts and actual revenue and expenditure	Cash flow date, accounting unit, revenue or expense group	Cash management system, Treasury Information System	No
Asset management framework agreements	ISDA, CSA and GMRA agreements	Counterparty	Securities management system, case management system	No

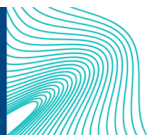

Information resource	Data by group	Examples of search criteria	Information systems related to the materials	Availability via a technical Interface (y/n)
Debt management database	Under the line, operational guidelines, agreements, and procedures	Transaction number, date of trade, value date, maturity date, counterparty, portfolio, instrument	Treasury information system, securities management system, monitoring system for serial bonds in secondary market trade, case management system	No / Yes = secondary market trading volume data via interface
Export financing database	Financial transactions, operational guidelines, agreements, and procedures	Transaction number, export credit reference number, date of trade, value date, maturity date, counterparty, portfolio, instrument	Securities management system, Treasury Information System, case management system	No
Government debt statistics	Data on government debt, borrowing, and risk management (e.g., liquidity reserves, interest expenses)	reporting period, instruments	Reporting databases, Power BI reporting, Government debt statistics are published on the website valtionevelka.fi	Yes, avoindata.tutkihallintoa.fi

3.7 State lending

Information resource	Data by group	Examples of search criteria	Information systems related to the materials	Availability via a technical Interface (y/n)
Direct loans database	The identification and contact details of borrowers, potential guardians, loan managers and other legal representatives, information related to the debtor status, information related to the loan, information related to the loan collateral, payment default entries, follow-up data from Suomen asiakastieto Oy and additional information requested from customers on a case-by-case basis.	Loan number, name, personal identity code, business ID, subject of collateral	Loan and collateral management system, customer information system, case management system, securities management system, electronic customer interface for loan customers, debt collection system	Yes, avoindata.tutkihallintoa.fi
Database for interest subsidies and state guarantees	Identification and contact details of interest subsidy loan recipients and State guarantee recipients potential guardians, loan managers and other legal representatives, information related to the debtor status, information related to the loan, State-paid interest subsidies and guarantee compensations as well as guarantee commissions received by the State, information related to the loan securities, payment default entries, follow-up data from Suomen asiakastieto Oy and additional information requested from customers on a case-by-case basis.	Loan number, name, personal identity code, business ID, municipality of residence, subject of collateral	Interest subsidy and state guarantee management system, loan and collateral management system, customer information system, case management system, debt collection system	Yes, avoindata.tutkihallintoa.fi
Reporting information on direct loans, interest subsidies and guarantees	Statistical data on direct loans, ASP and interest subsidy loans and state guarantees	Reporting period (interval), product category	Reporting databases, some of the information is published on the State Treasury website at valtiokonttori.fi	Yes, avoindata.tutkihallintoa.fi

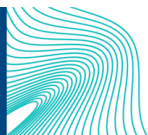

3.8 Promotion of the digital economy

Information resource	Data by group	Examples of search criteria	Information systems related to the materials	Availability via a technical Interface (y/n)
Database for promoting electronic business documents (Peppol authority)	Active Peppol service end users and transmitted business documents	Year, quarter (of year), number of end users, received and sent documents	Reporting databases, some of the information is published on the State Treasury website at valtiokonttori.fi	No

3.9 Improving public procurement

Information resource	Data by group	Examples of search criteria	Information systems related to the materials	Availability via a technical Interface (y/n)
Information resource for procurement notices (Hilma)	Advance notices, procurement notices, post-notices, contract amendments, and correction notices related to public procurement	Notice type, scope of procurement, procurement category, buyer organization, CPV code, publication schedule, contract performance location, source system, and type of procurement	Service for notices on public procurement Hilma	Yes, Hankintailmoitukset.fi API

3.10 Financial information database for municipalities and wellbeing services counties

Information resource	Data by group	Examples of search criteria	Information systems related to the materials	Availability via a technical Interface (y/n)
Financial information database for municipalities and wellbeing service counties	Budget and planning data, as well as financial performance and annual financial statement data for municipalities and wellbeing services counties, categorized by service classification	Municipality, wellbeing services county, reporting period	Financial information service for municipalities and wellbeing service counties, exploreadministration.fi	Yes, avoindata.tutkihallintoa.fi

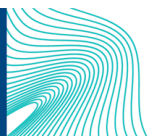

3.11 Stipulations and instructions issued by the State Treasury in its area of operation

Information resource	Data by group	Examples of search criteria	Information systems related to the materials	Availability via a technical Interface (y/n)
Stipulations and instructions issued by the State Treasury	Stipulations and instructions issued by the State Treasury (incl. revoked) concerning the state administration, state-owned enterprises, municipalities, wellbeing services counties, and businesses	Case number, issue date, target group, category / subject area, document type	Case management system, valtiokonttori.fi website	No

3.12 Central government consolidated accounting and accounting governance

Information resource	Data by group	Examples of search criteria	Information systems related to the materials	Availability via a technical Interface (y/n)
Central government consolidated accounting database	State budget economy State chart of accounts	Budgetary transactions, government branches, accounting units, budget class, budget items, budget main titles, budget accounting accounts, commercial accounting accounts and their additional classifications, account types, account groups, effective dates	Shared system solution for state financial and human resources management – Kieku, tutkihallintoa.fi website	Yes, avoindata.tutkihallintoa.fi
Breakdown of state budgetary accounts	Breakdown of State budgetary accounts from 2013 onward.	Account breakdown period of validity, year	System for drawing up and maintaining the budget account breakdown, case management system, budget account breakdowns are published at www.valtiokonttori.fi	No
Budget authority monitoring database	Number and use of budget commitments by means of budget authority procedure and the expenses resulting from their use during the budget year and in coming years.	Authority type, accounting unit (government agency etc.), appropriation type The information can be grouped by budget accounting, authority type, accounting unit organisation and type of appropriation.	Authority monitoring system, case management system, centralized authority monitoring data is included in the state's financial statements, which are published on the Government's website alongside the government's annual reports.	No

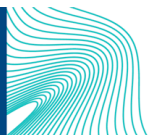

3.13 State payment transaction control and development

Information resource	Data by group	Examples of search criteria	Information systems related to the materials	Availability via a technical Interface (y/n)
State invoice routing database	Executed payment transaction volumes (units and euros) by accounting unit, billed service fees by service type Information on the invoice delivery channels used (Mobile Pay, OmaPosti, suomi.fi messages, consumer e-invoice, paper invoice)	Reporting month, accounting unit (government agency etc.), service type, invoice delivery channel	File management system, some of the information is published on the State Treasury website at valtiokonttori.fi	No
List of state bank accounts	Information on the income and expense accounts of the accounting units at payment transfer banks.	Accounting unit (agency, etc.), bank account number	File Management System	No
Accounting unit banking contract database	Contracts between accounting units and banks as well as data on changes to contracts	Accounting unit (government agency etc.), contract type	Payment transfer banks' contract management systems	No

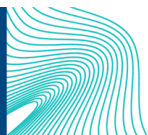

3.14 Development of state working life and sustainability

Databank	Data by group	Examples of search criteria	Information systems related to the materials	Availability via a technical Interface (y/n)
State working life development project register (Kaiku project register)	Name, contact information, project and its details	Government branch, government agency, start year, end year	Valtiolla.fi website, case management system	No

3.15 Production of analysis and reporting services for state government

Information resource	Data by group	Examples of search criteria	Information systems related to the materials	Availability via a technical Interface (y/n)
Analysis database for analytical services	Data analyses delivered to the Government and other customers	Date, customer	Analysis platform, case management system, some of the information is published at tutkihallintoa.fi	No
Data repository for the Public Administration Reporting Service (Tutkihallintoa.fi)	<p>Public administration (organizations and structure)</p> <p>Public administration information management map (data repositories, data transfers, statutory tasks)</p> <p>Public procurement (procurement value, procurement strategy, procurement expertise, noticing about procurement)</p> <p>Municipalities and joint municipal authorities' finances (budget, planning, and actual financial data)</p> <p>Wellbeing services counties and wellbeing services federations' finances (budget, planning, and actual financial data)</p> <p>State government (finances, personnel, facilities, sustainability and performance)</p> <p>State grants (Tutkiavustuksia.fi), grants to public-benefit entities</p>	Date, organization, domain-specific search criteria	Tutkihallintoa.fi	Yes, some of the information is available at avoindata.tutkihallintoa.fi

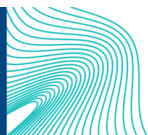

3.16 Online payment collection and management service for the public administration

Information resource	Data by group	Examples of search criteria	Information systems related to the materials	Availability via a technical Interface (y/n)
Online payment service database (Suomi.fi)	Customer and transaction volumes, contracts for the Suomi.fi payments service	Sector, payment method, organization, product group, date	Case management system, reporting databases, some of the information is published on the State Treasury website at valtiokonttori.fi	No

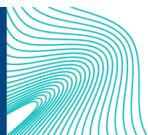

3.17 Recovery and Resilience Plan (RRP)

Databank	Data by group	Examples of search criteria	Information systems related to the materials	Availability via a technical Interface (y/n)
Recovery and Resilience Plan (RRP)	Indicators for reporting, name (support target), identification data (beneficiaries), identification data (contractors), identification data (contractor subcontractors), identification data (beneficiaries' and contractors' actual owners and beneficiaries) financial data, supervisory data, payment data, verification documents	Government branch, funding authority, reporting period, number of Finland's payment request	Public administration's joint project portfolio management service (Digital and Population Data Services Agency), RRP information system, case management system, tutkihallintoa.fi website, Shared system solution for state financial and human resources management – Kieku	No

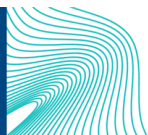

3.18 Government grant services

Information resource	Data by group	Examples of search criteria	Information systems related to the materials	Availability via a technical interface (y/n)
<p>Database for government grant activities (applyforgrants.fi and managegrants.fi)</p> <p>Grant authorities respond to requests for information related to state grants. The State Treasury is responsible for the technical functionality of the shared information system and related services.</p>	<p>Access by government grant authorities and the State Treasury: identification and contact details (applicant), application details, decision information (government grant), payment information (government grant), appeal information (government grant decision), information on the use of the grant, monitoring data on the use of the grant</p> <p>Access by the information system provider: log data on the use of the information system</p>	<p>Information on state grant calls, related applications and decisions, as well as reports associated with grants.</p> <p>For example: call name, grant authority, application period, call objectives, applications, applicants, decisions, granted subsidies, applied and awarded amounts, project descriptions, and reports on funded activities.</p>	<p>Shared information system for government grants, applyforgrants.fi, managegrants.fi</p>	<p>Yes, but the interface is not public</p>
<p>State grant reporting data repository (exploregiants.fi)</p>	<p>Minimum data on state grant calls and decisions as required by Government decree 1394/2022</p>	<p>See Government decree 1394/2022</p>	<p>exploregiants.fi, regarding minimum data on state grant calls applyforgrants.fi</p>	<p>No</p>
<p>Customer feedback and service requests of government grant services</p>	<p>Contact details (of those requesting service, feedback providers), feedback content, service request content</p>	<p>Email address, name, subject area of the service request or feedback, handler of the case in the feedback and service request processing system</p>	<p>Feedback and service request processing system</p>	<p>No</p>

3.19 Information resources of the supporting services

Information resource	Data by group	Examples of search criteria	Information systems related to the materials	Availability via a technical Interface (y/n)
Economic data repository	Procurement data Contract data Placed orders Purchase and sales invoices accounting transactions	Case number, person's name or company / organization name or business ID, invoice number, date information, tracking target (e.g., commercial accounting account, budgetary accounting account)	Central government joint order and invoice processing system, shared system solution for state financial and human resources management – Kieku, case management system, planning and monitoring system, service for notices on public procurement Hilma	State financial data is available at avoindata.tutkihallintoa.fi
Human resources data repository	Recruitment data Personnel data Employment relationship data Travel and expense reimbursements	Person's name, personal identity code, case number, date information	Shared system solution for state financial and human resources management – Kieku, travel and expense management information system, recruitment system valtiolle.fi , case management system	State personnel data is available at avoindata.tutkihallintoa.fi
Communications data repository	Publications Newsletters Press releases Event and activity information Stakeholder data Images and videos Social media posts	Publication title or heading, person's name, company or organization name, date information	Event sign-up system, electronic customer registry, State Treasury websites / publishing system, internal communication / publishing system, file management system, social media platforms	No

Information resource	Data by group	Examples of search criteria	Information systems related to the materials	Availability via a technical Interface (y/n)
State Treasury development portfolio	Project descriptions and budget information, information on responsible persons, project progress reports	State Treasury organizational unit (department), project manager's name, project name	Public administration's joint project portfolio management service (Digital and Population Data Services Agency), shared system solution for state financial and human resources management – Kieku, case management system, task management software	From the internal project portfolio system (= task management software), yes
State Treasury information system list	Information on the information systems currently / previously used by the State Treasury	Lifecycle status, responsible organizational unit (department), IT system contact person, procurement method, connection to operational process	Task management software	Yes
State Treasury Database list	Information on the databases used by the State Treasury	Database name, information system with which it is associated	Task management software	Yes
