Finnish central government borrowing

June 2024

AA+

AA+

Credit ratings

The government has solicited credit ratings from two credit rating agencies: Fitch Ratings and S&P Global Ratings.

For long-term debt, they are

AA+ and **AA+**

(stable, stable)

1 Finnish economy

Economy will rebound from recession this year

- Domestic demand improves as inflation slows, interest rates drop, and household incomes grow
- Recovering global trade will boost Finland's exports from 2025 as cost competitiveness is strong
- Government's consolidation measures (EUR 9bn by 2027) are expected to reduce demand, increase prices and weaken economic growth by a total of 0.5 per cent in 2025 and 2026.
- Finland's debt ratio will continue to grow but more slowly

	2023*	2024*	2025*	2026*
GDP change, %	-1.0	0.0	1.6	1.5
Inflation, %	6.2	1.8	1.6	1.5
Current account, % of GDP	-1.4	-1.1	-1.2	-1.1
Private investment change, %	-4.1	-2.4	3.9	3.7
Exports change, %	-1.7	-0.9	3.8	3.1
Unemployment rate, %	7.2	7.9	7.6	6.9
Public deficit, % of GDP	-2.7	-3.7	-3.1	-2.6
Public debt, % of GDP*	75.8	81.0	83.1	84.0

*The general government debt ratio increased by about 6 percentage points (approximately EUR 15 billion) from 66% to roughly 72% at the level of 2021 **due to Statistics Finland implementing a change in methodology**. The change was related to the interest subsidy loan system for rental and right-of-occupancy dwellings.

Domestic demand and investments to drive GDP growth from 2025

3 Sustainability

Sustainability in Finland: current themes

- Finland is by many metrics a global forerunner in sustainability
- Finland ranks #1 progress in towards the **Sustainable Development Goals**
- Finland's net zero emissions goal is 2035
 - New Climate Change Act in 2022
 - **Annual Climate Report** tracks progress towards the target
- National Biodiversity strategy underway
- More on **Finland & ESG**

Finland's national target is net zero carbon emissions by 2035

Emissions reduction targets set in the Climate Change Act

Latest estimate: rate of emission reductions in line with the 2030 target of climate act

- Finland's total emissions in 2023, 40.6 Mt Co₂ eq (excl. LULUCF), is **43% less than in 1990**
- Over past five years, rate of GhG emission reductions has averaged around 4% a year
- The phasing out of fossil fuels in electricity and heat production will be accomplished in the coming years
- Most challenging: the land use sector, where additional measures are needed to strengthen carbon sinks
